## Single National Curriculum (SNC)

One system of Education for all, in terms of curriculum, medium of instruction and a common platform of assessment so that all children have a fair and equal opportunity to receive high quality education.

### *One Curriculum, One Nation*

Non-uniformity in the curriculum has created a gap between the opportunities available for, rich and the poor, leading to disintegration in society. Implementation of a Single National Curriculum at all levels of education ties the society together by eliminating a major disparity which, later on, may prove to be the root cause of other social divides. Single National Curriculum aims to achieve cohesion and integration in society by gathering all and sundry on a single platform to achieve their goals in life. It overlooks the divisions in society which are based on class, color, language, social status, religion and culture, and provides a strong reason to remain united. The effective implementation of the policy of Single National Curriculum is based on inclusion of all forms of knowledge coming from different cultures, introduction of modern methods of learning and focusing on the development of critical thinking among students.

#### **Salient Features of Social Studies:**

- Organization of the curriculum in 6 strands including Citizenship, History, Government, Economics, Culture and Geography.
- Inclusion of national, global and digital citizenship education including rights and responsibilities.
- New themes include local government, ancient civilizations, agriculture, entrepreneurship, anti-corruption.
- Focus on democracy, patriotism and importance of rule of law.
- Holistic development of students through integration of peaceful coexistence, acceptance, respect and appreciation of diversity.
